## MINIMUM ESSENTIAL SERVICES

The charges below represent our minimum fees for non-declinable services required to facilitate the disposition of a deceased person, whether by cremation, burial, aquamation or donation of the body to science. Applicable to every client we serve, they cover the cost of transferring the deceased person from the place of death into our care, where they will be securely held until the necessary documentation is completed. Once the documentation is ready, i.e., the death has been registered and, if applicable, the coroner's certificate for cremation/aquamation or out-of-province transportation has been obtained, the deceased is moved in a service vehicle to the place of final disposition at the earliest practicable opportunity or at a scheduled time, as applicable.

Non-discretionary payments in addition to the minimum service charges listed include required disbursements to third parties, as detailed below, a container of the estate's choosing (e.g., casket, cremation container) and, if the distance we are required to travel exceeds 50 km from our location, transportation charges.

### Providing Your Own Urn

You may provide a suitable vessel to hold the cremated remains of the deceased. This container must be easily sealed and be large enough to contain human cremated remains. We are not responsible for any damage or defect that exists or may occur when the cremated remains are placed within the vessel. We reserve the right to refuse to fill a purchaser-provided vessel if we believe there is a risk of damaging it or if the vessel (e.g., a teapot) will not securely hold the remains.

**There is a fee of \$25.00 per urn or keepsake to place cremated remains when the urn is provided by the purchaser.**

## CASKETS

### Minimum Requirements for a Casket

- **For burial:** In the interest of the health and safety of the workers performing the interment, the by-laws of most cemeteries require a casket for a burial. The least expensive wood casket below is suitable. More expensive wood or metal caskets may also be used for burial.
- **For cremation:** A body must be presented to the crematorium in a rigid, leak-proof container made of a combustible material, such as wood or cardboard. Containers containing non-flammable, hazardous material or chlorinated or fibre-reinforced plastic, other than incidental metal, cannot be used for cremation. We offer a selection of inexpensive containers below that are suitable for cremation.
